*"Would recommend this course to friend and family"
R. Goeghegan Oct 2004*

What is the Course?

Removing the fear of rebooting your computer or re-installing Windows

- This course will help people to:
- o Save time and money
 - o Helps to remove the fear of technology
 - o Have the skills to fix a computer
 - o Meet new friends

Who can attend?

Anyone, this course is suitable for beginners.
Basic knowledge is an advantage, but is not necessary

When is it on?

February - December 2005
Over 2 days, 10am – 4pm
Please contact us for dates of next course

Who do we contact?

Midlothian Advice Resource Centre (MARC)
Telephone - 0131 663 0400
and ask for an application form

What do we get out of it?

People will learn new skills and not have to learn from a book. You will have a tutor all the time you are learning. It will boost your confidence and stop people from being afraid of computers. You will be working with a small group of people and you will learn more about a computer system in a friendly environment and be able to meet new friends. If you want to save time and money, this course will meet your expectations. People will receive the computer system they have repaired, and they will be able to get the opportunity to add other devices to your computer. You will be shown how to install these devices into your PC during the course. By installing Windows once into your PC you will save yourself over £80.

*"Found out the basics of the inner workings of a PC"
T. Szczypior Aug 2004*

*"This course will help people not to be afraid of Computers"
D.Forrest Oct 2004*
